

Hector Tarazona

| IT Project Manager | Solutions Architect | Presales Engineer |

Contact: +57 3214749047 | hectortaar@hotmail.com | LinkedIn: [linkedin.com/in/hector-tarazona](https://www.linkedin.com/in/hector-tarazona)

Professional Summary

Strategic IT Project Manager with more than 15 years of experience leading projects, programs, Agile initiatives, and digital transformation across North America and Latin America. PMP®, PMI-ACP®, PMI-RMP®, Scrum Master, and Product Owner certified, with experience managing complex enterprise technology projects and programs, including individual projects with budgets ranging from USD 2 million to USD 5 million.

Experienced across Agile, Predictive, and Hybrid delivery environments, with strong expertise in project governance, risk management, budgeting, stakeholder management, requirements, team coordination, and delivery. My experience combines Project Management, Agile delivery, technology strategy, solution architecture, and presales, enabling me to connect business objectives with technology execution and lead multidisciplinary teams while managing clients, vendors, manufacturers, and partners in complex, multicultural environments.

Languages: Native Spanish | English C1: professional proficiency, negotiation, and executive presentations | French B2: professional communication and participation in meetings | Portuguese B1: intermediate level in development, with working communication skills.

Core Competencies

Project & Delivery Management	Presales & Solutions Engineering
• Project leadership focused on value creation	• Technical discovery & requirements analysis
• Scope, budget, schedule & risk management	• Enterprise solution design & architecture
• Strategic alignment, profitability & ROI	• Technical & commercial proposals
• Multidisciplinary team & vendor leadership	• RFP/RFQ & BoM development
• Stakeholder & executive management	• Technical presentations & demonstrations
• Digital transformation & business value	• Value-based solution positioning

Professional Experience

➤ Cisco (red badge) | Jul 2022 – Mar 2026 | 3 years 9 months

Customer Project Manager – Cisco Engagement (Remote)

- Led more than 20 strategic IT projects for Cisco enterprise customers across North America, managing network, cybersecurity, collaboration, and data center initiatives from conception through closure.
- Managed portfolios with budgets exceeding USD 2 million, ensuring achievement of business objectives, schedules, scope, and profitability.
- Achieved 95% on-time delivery and 98% SLA compliance through governance models, executive KPI tracking, and proactive risk management strategies.
- Coordinated multidisciplinary teams, manufacturers, and senior stakeholders across the United States and Canada, ensuring successful execution in complex, multi-vendor technology environments.

➤ Koombea | Dec 2021 – Jul 2022 | 8 months

Senior IT Business Analyst (Remote)

- Led requirements definition and management for agile initiatives in the United States and Latin America, ensuring alignment between business objectives and technology capabilities.
- Developed more than 100 user stories and functional specifications, enabling efficient execution and higher solution delivery quality.
- Reduced rework by approximately 25% through effective stakeholder management and rigorous requirements definition.
- Served as a strategic liaison between business areas and technical teams, ensuring delivery of solutions aligned with client expectations.

➤ Claro Colombia | Jan 2020 – Dec 2021 | 2 years

Presales Engineer – IT Projects

- Led more than 30 end-to-end presales initiatives for enterprise customers, designing multi-vendor architectures across networking, cybersecurity, and collaboration.
- Designed integrated solutions based on Cisco, Fortinet, Aruba, Huawei, and Juniper technologies, ensuring interoperability, scalability, and alignment with clients' technology environments.

- Contributed to an approximately 40% commercial success rate and influenced more than USD 5 million in business opportunities through solution design, BoM development, and value-based technical positioning.
- Translated business requirements into HLD/LLD architectures for LAN, WAN, SD-WAN, and secure access environments, reducing proposal development time by approximately 20% and accelerating sales cycles.

➤ **Controles Empresariales** | Mar 2019 – Dec 2019 | 10 months

IT Solutions Architect

- Designed more than 8 enterprise IT solutions aligned with strategic business objectives in networking and technology infrastructure.
- Achieved approximately 20% infrastructure cost reductions through architecture optimization and efficient technology selection.
- Assessed clients' technology environments and identified appropriate solutions to address complex business and operational challenges.
- Collaborated with sales teams on more than 5 strategic opportunities, delivering technical demonstrations and strengthening solution positioning with clients.

English Language Studies | Sydney, Australia | Mar 2018 – Feb 2019 | 12 months

- Intensive English language program focused on achieving professional fluency for international technology environments.

➤ **Telmex** | Nov 2007 – Feb 2018 | 10 years 3 months

Presales Consultant / IT Project Manager

- Prepared more than 100 RFP and RFQ responses for enterprise customers, designing scalable multi-vendor architectures across networking, cybersecurity, and technology infrastructure.
- Contributed to business opportunities exceeding USD 30 million, achieving an average success rate of approximately 35% through solution design, BoM development, and executive presentations focused on business value.
- Led discovery workshops and developed HLD/LLD architectures, ensuring solution alignment with security, performance, and regulatory requirements.
- Directed more than 50 IT projects over a 10-year period, achieving a success rate above 90% through governance, risk management, and stakeholder alignment practices based on PMI standards.

➤ **Telefónica Movistar Colombia** | Nov 2006 – Nov 2007 | 1 year

Presales Engineer

- Designed WAN/LAN solutions and contributed to technology infrastructure proposals for enterprise customers, supporting business opportunity development.
- Led the implementation and operation of telecommunications infrastructure based on microwave, satellite, and radio technologies, ensuring high levels of availability and performance.
- Achieved availability levels above 99% through monitoring, maintenance, and incident management practices focused on operational continuity.

Education

https://www.credly.com/badges/8f8da000-b603-446d-af54-7a14a286db45/public_url
